Sight Words Learning Case Studies:

Improving Literacy in the Primary School R. P. Chamberlin, G. S. Haynes, E. C. Wragg, Prof E C Wragg, 2005-07-28
One of the most important challenges teachers face is making sure children can read. It is an absolutely crucial skill and current educational policy is giving it a very high priority. Based on one of the largest studies ever undertaken of what primary schools do to improve literacy, this book reports what Professor Ted Wragg and his research team found. The importance placed on literacy has never been greater. When children learn to read, they are laying the foundations for their entire educational future. Effective teachers can make a huge difference, as a poor start can hinder children throughout their schooling and beyond. By looking at what actually goes on in classrooms, this volume provides an invaluable insight into what happens to children and how their reading progresses. It shows how particular teachers manage the improvement of their pupils' reading levels and also follows individual pupils through a school year. This is a very readable account of a fascinating and crucial area of research that is highly topical. Every class teacher should read it. [Educating Learners with Down Syndrome](#)

Rhonda Faragher, Barbara Clarke, 2013-10-23
For individuals with Down syndrome, the extent of the effect of intellectual disability depends largely on the degree of provision of appropriate support and intervention. In [Educating Learners with Down Syndrome](#), editors Rhonda Faragher and Barbara Clarke have brought together a number of expert contributors whose chapters review recent findings in the field of DS education, highlight promising practices, and identify areas for future research. While the emphasis is primarily on the school years, links to early intervention and to life post 16 are made. Chapters are organized into three parts: conceptual overview of issues in learning and teaching; learning mathematics and literacy development. The book is also united by the cohesive themes of assessment, evidence-based practice, and inclusive practices. [Educating Learners with Down Syndrome](#) importantly incorporates the voices of individuals with Down syndrome whose personal narratives add significance to the research mission of the text and demonstrate the authors' inclusive philosophy. Aimed at researchers, teacher educators, higher degree students, and policy makers, this book is the first of its kind to provide a compendium of research on educating learners with Down syndrome. Fully revised and updated to reflect changes in the field, each chapter synthesizes the research, explores if and how this knowledge is currently used in schools, and
