The 3-3 Point Modern Opening Strategy Ch'i-hun Cho,1991 Opening theory in go has a long history and has undergone many changes In the 17th through 19th centuries the first move in the corner was usually played on the 3 4 point or occasionally the 5 3 or the 5 4 point The star point was almost never played Then in the mid 1930s the New Fuseki became the vogue The star point became a key feature and emphasis was placed on central influence In present day opening theory the star point still carries great weight since it occupies the corner in one move has a powerful influence along the sides and permits a much faster development than the 3 4 point Its weakness lies at the 3 3 point from which the corner territory can easily be destroyed However more and more openings are being played today which emphasize tight territorial control Here again the 3 3 point is critical whether played to secure the corner territory with one move or to destroy the opponents corner territory In these openings many questions arise about joseki in relation to the surrounding positions In other words joseki cannot be confined to just one corner or just one side the whole board must be taken into account This book analyzes the role of the 3 3 point in opening strategy and features examples taken from about 100 of Chi Chikun s games The opening is the most enjoyable part of the game to study It is also the most intuitive part of the game and its concepts are the easiest to grasp Any reader who knows the rules should make effortless progress by reading this book
