Technology and Cosmogensis Paolo Soleri,1985      **Telos** ,1994      Soleri Antonietta Iolanda Lima,2003 Architect philosopher craftsman and pioneer of ecologically sound design Paolo Soleri is a pivotal figure in twentieth century architecture Born in Turin in 1919 Soleri first came to the United States to work with Frank Lloyd Wright in the 1940s but he soon broke from the master and began developing his own plans for a city of the future based on the concept of arcology architecture sympathetic to ecology Animated by a powerful intellect a fertile imagination and a commitment to serve mankind and protect the health of the planet Soleri has devoted much of his life to designing alternative urban planning models His vision of communal living in densely clustered superstructures is an antidote to suburban sprawl pollution the squandering of energy and raw materials and what author Antonietta Iolanda Lima calls the dictatorship of the automobile

Arcosanti Paolo Soleri,1993      Chrysalis ,1987      Design Book Review ,1987      Manifesto for a Global Civilization Matthew Fox,Brian Swimme,1982      **Futurizing the Jews** Tsvi Bisk,Moshe Dror,2003-11-30 Bisk and Dror assert that the 21st Century can be the Jewish Century that no other people is better prepared to face its challenges However to do so a stress on the Jewish Future must replace a preoccupation with the Jewish Past They offer a neo Zionist ideological analysis of modern Jewish life as an alternative to both classical Zionism and post Zionism They conceptualize a Jewish Grand Strategy by clearly defining and delineating between ideology policy grand strategy strategy and tactics with compelling proposals for what such a revised Grand Straegy might entail They suggest a concept of reinvigorated Israel Diaspora relations based on this new Grand Strategy and the potential of the Information Technology Revolution They also offer a conception of Jewish spirituality that could be as appealing to secular as to religious Jews They reject the concept of a Nation that Dwells Alone Throughout the ages Jews have affected and been affected by the world more than any other People they assert They also reject the view that suffering is the dominant feature of Jewish history as this lachrymose perception cannot inspire needed Jewish ambitions in the young They stress the needs of the Jewish person and insist that there can be no real significance to the continued existence of the Jewish People unless the real life concrete needs of the individual are addressed As former Israeli Ambassador to the United Nations and former Cabinet Minister Gad Yaacobi asserts in his foreword The book is original iconoclastic and in some ways revolutionary it challenges inherited assumptions and calls for positive action I believe we have before us a book that must become a reference point for Jewish policy makers as quickly as possible      The Writer's Directory, 1998-2000 Miranda H. Ferrara,1995 Information on more than 17 500 living authors from English speaking countries      Choice ,1990      Journal of Scientific & Industrial Research ,1983      **American Bookseller** ,1985      **Index of Economic Articles in Journals and Collective Volumes** ,1982      **Consecrating Science** Lisa H. Sideris,2017-08-15 In *Consecrating Science* Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending

ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe
