Technology and Society under Lenin and Stalin Kendall E. Bailes, 2015-03-08 From the Soviet technical intelligentsia emerged more than three quarters of recent Politburo members including Brezhnev Kosygin and Podgorny The largest single group of dissenters including Grigorenko Sakharov and Solzhenitsyn have also been members Originally published in 1978 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Industry, State, and Society in Stalin's Russia, 1926-1934 David R. Shearer, 2018-09-05 In his reexamination of the origins of the Stalinist state during the formative period of rapid industrialization in the late 1920s and early 1930s David R Shearer argues that a centralized state controlled economic system was the consciously conceived political creation of Stalinist leaders rather than the inevitable by product of socialist industrialization Focusing on the different economic and bureaucratic cultures within the industrial system Shearer reconstructs the debates in 1928 and 1929 over administrative financial and commercial reform He uses information from recently opened archives to show that attempts by the state s trading organizations to create a commercial economy enjoyed wide support offering a model that combined planning and rapid industrialization with social democracy and economic prosperity In an effort to crush the syndicate movement and establish tight political control over the economy Stalinist leaders intervened with a program of radical reforms Shearer demonstrates that professional engineers planners and industrial administrators in many cases actively supported the creation of a powerful industrial state unhampered by domestic social and economic constraints The paradoxical result Shearer shows was a loss of control The overly centralized system that emerged during the first Five Year Plan was rendered incoherent by periodic economic crises and the continuing influence of partially suppressed social and market forces

Reconceptualizing the Industrial Revolution Jeff Horn, Leonard N Rosenband, Merritt Roe Smith, 2010-10-29 Closely linked essays examine distinctive national patterns of industrialization This collection of essays offers new perspectives on the Industrial Revolution as a global phenomenon The fifteen contributors go beyond the longstanding view of industrialization as a linear process marked by discrete stages Instead they examine a lengthy and creative period in the history of industrialization 1750 to 1914 reassessing the nature of and explanations for England s industrial primacy and comparing significant industrial developments in countries ranging from China to Brazil Each chapter explores a distinctive national production ecology a complex blend of natural resources demographic pressures cultural impulses technological assets and commercial practices At the same time the chapters also reveal the portability of skilled workers and the permeability of political borders The Industrial Revolution comes to life in

discussions of British eagerness for stylish middle class products the Enlightenment's contribution to European industrial growth early America's incremental rather than revolutionary industrialization the complex connections between Czarist and Stalinist periods of industrial change in Russia Japan's late and rapid turn to mechanized production and Brazil's industrial financial boom By exploring unique national patterns of industrialization as well as reciprocal exchanges and furtive borrowing among these states the book refreshes the discussion of early industrial transformations and raises issues still relevant in today's era of globalization

The Politics of Soviet Culture Timothy Edward O'Connor, 1983 *Soviet Space Mythologies* Slava Gerovitch, 2015-06-18 From the start the Soviet human space program had an identity crisis Were cosmonauts heroic pilots steering their craft through the dangers of space or were they mere passengers riding safely aboard fully automated machines Tensions between Soviet cosmonauts and space engineers were reflected not only in the internal development of the space program but also in Soviet propaganda that wavered between praising daring heroes and flawless technologies *Soviet Space Mythologies* explores the history of the Soviet human space program within a political and cultural context giving particular attention to the two professional groups space engineers and cosmonauts who secretly built and publicly represented the program Drawing on recent scholarship on memory and identity formation this book shows how both the myths of Soviet official history and privately circulating counter myths have served as instruments of collective memory and professional identity These practices shaped the evolving cultural image of the space age in popular Soviet imagination *Soviet Space Mythologies* provides a valuable resource for scholars and students of space history history of technology and Soviet and post Soviet history

The Co-opting of Education by Extremist Factions Sarah Gendron, 2020-01-31 *The Co-opting of Education by Extremist Factions* Professing Hate is a study of the ways in which various extremist groups have appropriated education for social manipulation in order to gain political power and in some cases to incite violence It is a detailed exploration of case studies representing both a wide range of situational differences time place and political orientation and experiential similarities To examine a broad scope of circumstances this book explores various types of rule from National Socialism to communism to capitalism from around the world Europe Asia Africa and North America and spans time periods from the mid twentieth century to the beginning of the twenty first century With the purpose of allowing these diverse situations to dialogue with one another this study explores each country in its own right as well as in relation to others ultimately demonstrating the extent to which they influenced one another

Hammer and Rifle David R. Stone, 2000 Analysis of the central role of militarization in the development of state society and economy in the U S S R between the end of the New Economic Plan in 1926 and the conclusion of the first Five Year Plan in 1933

The Engineer Of Revolution Timothy Edward O'Connor, 1992-03-22 This is the first Western biography of L B Krasin a leader of the Bolshevik wing of the Russian Social Democratic Workers Party commissar of foreign trade in the Soviet government in the 1920s and one of the foremost Soviet diplomats of his era This meticulously documented book is based on

extensive research in Soviet and Western archives and libraries as well as on Krasin's personal unpublished letters. It reviews Krasin's revolutionary conduct including his technical organization of V. I. Lenin's expropriations, robberies of Tsarist banks and post offices by secret Bolshevik fighting squads. Krasin's revolutionary activities were quite remarkable considering his prominent position in Russian society. By the 1905 Revolution he had become one of the leading engineers in the country and had acquired an international reputation for his expertise in chemical and electrical engineering. This biography examines Krasin's significant role in consolidating the Soviet government through the recruitment of technical specialists, his pursuit of Western credits and loans for economic reconstruction and modernization, and his work to establish diplomatic relations between the new government and Western European governments during the first part of the 1920s. The book devotes considerable attention to the reasons for his staunch defense of the Soviet monopoly of foreign trade. There is also careful treatment of Krasin's ideology of a technological utopia, a socialist technocracy in Soviet Russia.

Science, Technology, and Everyday Life, 1870-1950 Colin Chant, Richard Bessel, 1989. Eloquent Spaces adopts the twin analytic of meaning and community to write a fresh history of building in early India. It presents a new perspective on the principles and practices of early Indian architecture. Defining it broadly over a range of space, the book argues for architecture as a form of cultural production as well as public consumption. Ten essays by leading archaeologists, architects, historians, and philosophers examining different architectural sites and landscapes including Sanchi, Moodabidri, Srinagar, Chidambaram, Patan, Konark, Basgo, and Puri demonstrate the need to look beyond the built form to its spirit, beyond aesthetics to cognition, and thereby to integrating architecture with its myriad living contexts. The volume captures some of the semantic diversity inherent in premodern Indian traditions of civic building, both sacred and secular, which were however unified in their insistence on enacting meaning and a transcendent validity over and above utility and beauty of form. The book is a quest for a culturally rooted architecture as an alternative to the growing crisis of disembodiedness that informs modern praxis. This volume will be of interest to scholars and practitioners of architecture, ancient Indian history, philosophy, art history, and cultural studies.
