Technology Entrepreneurs And Silicon Valley:

Technology, Entrepreneurs, and Silicon Valley Carol Whiteley,2002 **High-technology Entrepreneurship in Silicon Valley** Robert W. Fairlie,2011 **Indian Entrepreneurs in Silicon Valley** , [You Can Be a Silicon Valley Success](#) Andre Gueziec,2017-02-19 I wrote this book to tell my story and to encourage entrepreneurs in pursuing their dreams Part of its contents centers on the story of how I started grew and eventually sold my high tech business in Silicon Valley I interrupt the narrative in several places to pause and discuss relevant topics for entrepreneurs such as obtaining funding hiring salespeople or working on making a satisfying exit happen At the time this book is being published the Silicon Valley spirit centers on extreme competition and the view that failure is the only alternative to world domination Not only is this a fallacy but such thinking is a sure recipe for unhappiness and waste of good ideas as well as potentially good businesses and surely the present book holds the complete opposite view It is quite achievable to create a successful high tech business of a reasonable size that will attract valuable suitors and possibly will be highly profitable on its own as well My success does not have the scale or the scope achieved by the big Silicon Valley moguls and so be it It allows me however to not worry about the next paycheck any time now or in the future I came to Silicon Valley as an entrepreneur and a cultural transplant someone trained in computer science and programming but not in business So I learned by experience the things that every high tech entrepreneur should know if he or she has a good original idea and would like to profit from bringing it to the marketplace My idea was new at the time When I started out you could not get real time traffic mapping on television something we now take for granted It s a precise and visually satisfying tool that gives the ability to escape an unwanted traffic glitch caused by anything from a storm to a road spill Traffic mapping devices in our vehicles and traffic news reports on television use this technology to show colorful traffic pictures that alter instantly before our eyes Three dimensional 3D graphics in real time rely on a great deal of numerical data which is and was my area of expertise I believed I could provide the technology to improve traffic reporting and I did My success did not follow the typical path of new tech business ventures which makes me a Silicon Valley nonconformist of sorts partially by intent and partly by accident I did some pretty interesting things that worked well for me and a few things that did not This book is my attempt to help other high tech entrepreneurs avoid the common pitfalls and traps that can get in the way of being a success in Silicon Valley Because it really is possible to be a success without necessarily creating the next Facebook **Silicon Valley: Planet Startup** Peter Ester,Arne Maas,2025-10-01 For decades now Silicon Valley has been the home of the future It s the birthplace of the world s most successful high tech companies including Apple Yahoo Google Facebook Twitter and many more So what s the secret What is it about Silicon Valley that fosters entrepreneurship and innovation With **Silicon Valley Planet Startup** Peter Ester and Arne Maas argue that the answer lies in Silicon Valley s culture a corporate culture that values risk taking creativity invention and sharing Through extensive interviews with Dutch entrepreneurs working in the area Ester and Maas show that

Silicon Valley is above all a mind set a belief in thinking with passion and ambition far beyond the here and now Scholars and business people and budding entrepreneurs alike are sure to find both inspiration and illumination in the stories and analyses Ester and Maas have assembled here

Handbook of Research on High-Technology Entrepreneurs The late Ayala Malach-Pines, Mustafa F. Özbilgin, 2010-01-01 Presents an overview of empirical and conceptual developments in the study of high tech entrepreneurs from an interdisciplinary and multinational perspective This book explores various conceptual frameworks and definitions of high tech entrepreneurs and of the entrepreneurial process based on studies in different settings and contexts

High-Tech Start-Ups and Industry Dynamics in Silicon Valley Junfu Zhang, 2003-07-01

Cloning Silicon Valley David Rosenberg, 2002 Silicon Valley is the hub of new technology new companies new working practices and new wealth It boasts the highest number of millionaires in the world This book profiles the regions aiming to replicate the stunning business success of Silicon Valley and the next generation of entrepreneurs and high growth tech based companies

Technology Entrepreneurship in Africa Samuel Adomako, Francis Donbesuur, Kwabena Frimpong, Marcia Mkansi, Nadia Zahoor, Stella Nyongesa, 2026-03-31

Technology Entrepreneurship in Africa examines how technological innovation policy reform and inclusive ecosystems are reshaping the future of business and development across the continent This book brings together contemporary research empirical case studies and practical insights to explore how African entrepreneurs are using technology to solve local challenges create jobs and drive sustainable economic transformation Covering examples from diverse sectors and regions it highlights how digital platforms fintech solutions and artificial intelligence are redefining enterprise creation while also addressing social and structural inequalities Written for both academic and general audiences the book combines theoretical analysis with real world perspectives to show how entrepreneurs are navigating infrastructural gaps financial constraints and institutional complexity Readers will encounter examples of how mobile money systems expand access to finance how start ups harness renewable energy to promote sustainability and how young innovators and women led enterprises are building

resilient digital ecosystems Across 14 chapters contributors demonstrate that Africa s technology entrepreneurs are not merely adapting to global trends but also they are actively shaping the direction of the global digital economy This book is both an analytical resource and a call to action It challenges conventional narratives that frame Africa as a follower in technological innovation and instead presents the continent as a source of creativity resilience and leadership By connecting technology with inclusion policy and sustainable growth the book offers valuable insights for researchers policymakers investors and practitioners committed to advancing equitable and transformative innovation

Pathways to High-Tech Valleys and Research Triangles Willem Hulsink, J. J. M. Dons, 2008-05-23 About the book The contents of most of the chapters included in this volume were originally presented and discussed during the academic workshop High tech Valleys and Research Triangles in the East of the Netherlands and elsewhere held on 30 November and 1 December 2005 at the Wageningen International Congress Centre WICC in the Netherlands At that time we had an informal agreement with Rob Bogers series editor of the Wageningen UR Frontis book series that if the quality and quantity of the talks and papers at the seminar would be sufficient and if there was willingness among the potential authors an edited book volume based upon the results of the workshop would be a possibility After the workshop when we had a critical mass of ten chapters and a dedicated group of committed authors the book project was given the green light As editors we realized that there were still a couple of topics and themes missing and when we had found colleagues for these four additional chapters that needed to be written our Frontis book was on the roll Although most of the time it was great fun the whole process of writing reviewing rewriting editing and proofreading took a lot of time much more time than we originally had foreseen We would like to thank all authors of the fourteen chapters of this book for their excellent contributions

High-Technology Entrepreneurship in Silicon Valley Opportunities and Opportunity Costs Robert W. Fairlie, Aaron Chatterji, 2013 The economic expansion of the late 1990s undoubtedly created many opportunities for business creation in Silicon Valley but the opportunity cost of starting a business was also high during this period because of the exceptionally tight labor market A new measure of entrepreneurship derived from matching monthly files from the Current Population Survey CPS is used to provide the first test of the hypothesis that entrepreneurship rates were high in Silicon Valley during the Roaring 90s Unlike previous measures of firm births based on large nationally representative datasets the new measure captures business creation at the individual owner level includes both employer and non employer business starts and focuses on only hi tech industries Estimates from the matched CPS data indicate that hi tech entrepreneurship rates were lower in Silicon Valley than the rest of the United States during the period from January 1996 to February 2000 Controlling for the large concentration of immigrants and highly educated workforce does not change the conclusion Examining the post boom period we find that entrepreneurship rates in Silicon Valley increased from the late 1990s to the early 2000s In contrast trends in entrepreneurship rates in the United States were constant over this period Although Silicon Valley may be an entrepreneurial

location overall the extremely tight labor market of the late 1990s especially in hi tech industries may have suppressed business creation during this period [Angel](#) Jason Calacanis,2017-07-18 One of Silicon Valley s most successful angel investors shares his rules for investing in startups There are two ways to make money in startups create something valuable or invest in the people that are creating valuable things Over the past twenty five years Jason Calacanis has made a fortune investing in creators spotting and helping build and fund a number of successful technology startups investments that have earned him tens of millions of dollars Now in this enlightening guide that is sure to become the bible for twenty first century investors Calacanis takes potential angels step by step through his proven method of creating massive wealth startups As Calacanis makes clear you can get rich even if you came from humble beginnings his dad was a bartender his mom a nurse didn t go to the right schools and weren t a top student The trick is learning how angel investors think Calacanis takes you inside the minds of these successful moneymen helping you understand how they prioritize and make the decisions that have resulted in phenomenal profits He guides you step by step through the process revealing how leading investors evaluate new ventures calculating the risks and rewards and explains how the best startups leverage relationships with angel investors for the best results Whether you re an aspiring investor or a budding entrepreneur Angel will inspire and educate you on all the ins of outs Buckle up for a wild ride into the world of angel investing **Secrets of Silicon Valley** Deborah Perry Piscione,2025-04-16 While the global economy languishes one place just keeps growing despite failing banks uncertain markets and high unemployment Silicon Valley In the last two years more than 100 incubators have popped up there and the number of angel investors has skyrocketed Today 40 percent of all venture capital investments in the United States come from Silicon Valley firms compared to 10 percent from New York In Secrets of Silicon Valley entrepreneur and media commentator Deborah Perry Piscione takes us inside this vibrant ecosystem where meritocracy rules the day She explores Silicon Valley s exceptionally risk tolerant culture and why it thrives despite the many laws that make California one of the worst states in the union for business Drawing on interviews with investors entrepreneurs and community leaders as well as a host of case studies from Google to Paypal Piscione argues that Silicon Valley s unique culture is the best hope for the future of American prosperity and the global business community and offers lessons from the Valley to inspire reform in other communities and industries from Washington DC to Wall Street [21st Century Management: A Reference Handbook](#) Charles Wankel,2008 Ordered as part of a set on ID 7574134 **Communication Technology** Everett M. blood prophecy harvey alyxandra amazon co uk health - Apr 11 2023

web alyxandra harvey did an amazing job of conveying the vast range of emotions from love to hate and betrayal to trust we
see certain couples stronger than ever and we see an unexpected teamwork from usual enemies i loved the book the action
was bittersweet and the glimpses of romance were a perfect touch it s a shame that the series is over
