Violent Stars:

Violent Stars Phyllis Gotlieb, 1999-03-15 An interstellar alien corporation run by aliens was thwarted in its plans to exploit genetically altered slaves Now in an attempt to keep it s case from ever coming to court a judge is murdered on Khagodis the planet where the amphibious human slaves were first bred and the man who first broke the slave ring must find a way to bring these villains to justice

HERMETIC ASTROLOGY THE PRECESSION CYCLES OF THE FIXED STARS AND INDIVIDUAL AND WORLD EVENTS GIACOMO ALBANO, 2025-11-08 True Hermetic astrology is not one that deals with reincarnation or other unprovable things The goal of the Hermeticist is to discover the secret links that bind earthly aspects to each other and to their corresponding celestial counterparts The astrological techniques that we have inherited from tradition are not always the most suitable for explaining and predicting events because they actually only catch the last connections in a chain of further underlying celestial causes In fact the primary reasons of all events are always found only in the Eighth Sphere that is in the heaven of the constellations and fixed stars This book summarizes the main results of the author s research in the field of Stellar Astrology It begins with three essays illustrating the various astrological uses of methods based on the maximum and minimum declination reached by each star during the precession cycle From Egyptian archaeoastronomy to world and individual astrology it will show how and why these star stopping points whose astrological efficacy lasts some 26 000 years can be activated at any time by other stars or planets The geometric patterns formed by the stars at their lower and upper stopping points and their subsequent activations represent the true and hidden root cause of most events and not only world events There are also other essays in which the techniques of Stellar Astrology are applied to Local Space Astrology Medical Astrology and also to the platonic concept of the Mother Star The last two essays solve the age old problem of the longitude of places on a stellar basis In particular it is the cycle of the brightest star in the sky Sirius We will see how and why the meridian passing through the Great Pyramid of Giza must be considered the fundamental meridian and we will also explain why this has much to do with the precession cycle of Sirius which was precisely the limit star at Giza when it reached its minimum declination Most importantly we will illustrate how you can use this discovery in your astrological practice There is then an essay in which we explain the astronomical significance of the six pointed star also known as the Star of David or Solomon s seal We will see that the Star of David is also literally a very specific star which in Jewish tradition is the symbol of the house of David and the tribe of Judah We will look at what are the astronomical peculiarities of this star in Jerusalem when it was at its lowest stopping point lowest declination And finally the fundamental essay in which we explain what a Stargate is and how it opens from an astrological point of view These are channels of communication between heaven and earth some of them universal others individual We could define an individual Stargate as a particular point in time and space where our illusory perception based on the five senses and the most common associations of ideas takes a step back and allows us to perceive things in a different way This happens on the one hand

because of the occurrence of a series of particularly perfect stellar and planetary geometries that is because of a certain magical combination of stars and planets that are also among the strongest and most effective stars in its individual Microcosm By studying these exceptional cases in this essay the astrological conditions that favor these kinds of events are recognized And of course once they are identified you can act in your election to prepare everything in the best possible way

Brady's Book of Fixed Stars Bernadette Brady,1998-01-15 For the first time this book offers astrologers Paran Maps and Star Phases for over 60 stars new insights into the natal use of fixed stars as well as their use in mundane astrology extensive appendices of Heliacal Rising and Acronychal Settinggraphs and tables so that for any given location the dates of these risings and settings can be found a list of 176 stars with their 21st century Ptolemaic precessed positions versus their commonly considered positions based on Ulugh Beg s methods

Technology and Reality J.K. Feibleman,2012-12-06 In the following pages I have endeavored to show the impact on philosophy of tech nology and science more specifically I have tried to make up for the neglect by the classical philosophers of the historic role of technology and also to suggest what positive effects on philosophy the almost daily advances in the physical sciences might have Above all I wanted to remind the ontologist of his debt to the artificer tech nology with its recent gigantic achievements has introduced a new ingredient into the world and so is sure to influence our knowledge of what there is This book then could as well have been called Ethnotechnology An Explanation of Human Behavior by Means of Material Culture but the picture is a complex one and there are many more special problems that need to be prominently featured in the discussion Human culture never goes forward on all fronts at the same time In our era it is unquestionably not only technology but also the sciences which are making the most rapid progress Philosophy has not been very successful at keeping up with them As a consequence there is an enormous gulf between scientists and philosophers today a gulf which is as large as it has ever been 1 I can see that with science moving so rapidly its current lessons for philosophy might well be outmoded tomorrow
