## **Who Survives Cancer:**

Who Survives Cancer? Howard P. Greenwald, 1992-01-01 Uses a ten year study of cancer survivors to examine how class race sex psychological state type of health care and available treatment affect one's chances of surviving cancer **Who Survives Cancer?** Howard P. Greenwald, 2024-06-28 Howard P Greenwald takes an incisive look at how class race sex psychological state type of health care and available treatments affect one's chance of surviving cancer Drawing on a ten year survival study of cancer patients he synthesizes medical epidemiological and psychosocial research in a uniquely interdisciplinary and eye opening approach to the question of who survives cancer and why Scientists health care professionals philanthropists government agencies and the public all agree that significant resources must be allocated to fight this dreaded disease But what is the most effective way to do it Greenwald argues that our priorities have been misplaced and calls for a fundamental rethinking of the way the American medical establishment deals with cancer He asserts that prevention and experimental therapy have only limited value whereas the availability of conventional medical care has a greater influence on cancer survival Class and race become strikingly significant in predicting who has access to health care and thus can obtain medical treatment in a timely effective manner Greenwald counters the popular notion that personality and psychological factors strongly affect survival and he underscores the importance of early detection His research shows that health maintenance organizations while sometimes prone to delays offer low income patients a better chance of ultimate survival Greenwald pleads for immediate attention to the inadequacies and inequalities in our health care delivery system that deter patients from seeking early medical care Instead of focusing on research and the hope for a breakthrough cure Greenwald urges renewed emphasis on ensuring available health care to all Americans In its challenge to the thrust of much biomedical research and its critique of contemporary American health care as well as in its fresh and often counterintuitive look at cancer survival Who Survives Cancer is invaluable for policymakers health care professionals and anyone who has survived or been touched by cancer This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992 A Cancer Survivor's Almanac National Coalition for Cancer Survivorship, 1996-11-20 I'm thrilled that this book is available to cancer survivors I only wish I'd had a copy 10 years ago when I was diagnosed with breast cancer Jill Eikenberry actor and breast cancer advocate A valuable resource for survivors Peari Moore RN MN FAAN Executive Director Oncology Nursing Society A Cancer Survivor's Almanac is a clearly written sensitive and sensible guide to surviving with cancer This almanac can help you more comfortably and knowledgeably take charge of your life with cancer David Spiegel MD Professor of Psychiatry Behavioral Sciences Stanford University School of Medicine and author Living Beyond Limits Ballantine 1994 This
