Fifty Key Figures in Science Fiction Mark Bould, Andrew Butler, Adam Roberts, Sherryl Vint, 2009-09-10 Fifty Key Figures in Science Fiction is a collection of engaging essays on some of the most significant figures who have shaped and defined the genre. Diverse groups within the science fiction community are represented from novelists and film makers to comic book and television writers. Important and influential names discussed include Octavia Butler, George Lucas, Robert Heinlein, Gene Roddenberry, Stan Lee, Ursula K. Le Guin, H. G. Wells. This outstanding reference guide charts the rich and varied landscape of science fiction and includes helpful and up to date lists of further reading at the end of each entry. Available in an easy to use A-Z format. Fifty Key Figures in Science Fiction will be of interest to students of Literature, Film Studies and Cultural Studies.

The Inter-Galactic Playground Farah Mendlesohn, 2009-07-15 Science fiction is often considered the genre of ideas and imagination which would seem to make it ideal for juveniles and young adults however the ideas are often dispensed by adults. This book considers the development of science fiction for children and teens between 1950 and 2010 exploring why it differs from science fiction aimed at adults. In a broader sense this critical examination of 400 texts sheds light on changing attitudes toward children and teenagers toward science education and toward the authors' expectations and sociological views of their audience.

British Science Fiction Nicholas Ruddick, 1992-05-27 This chronology outlines British science fiction from 1479-1990 highlighting the important biographical and publishing events in the field of science fiction literature and fandom as well as in other media. The chronology includes biographical information on more than 700 authors, listings of more than 2,000 works including anthologies, criticism and essays, publishing and fandom milestones, first publications and awards. The works are fully cross referenced and indexed with introductory definitions of the field and descriptive headnotes for five periods: The Descent of Scientific Romance 1478-1894, The Wellsian Synthesis 1895-1936, British Science Fiction 1937-1961, New Wave Speculative Fiction 1962-1978, and The British Fantastic 1979-1990. This book is an outgrowth of and is complementary to Ruddick's critical work *Ultimate Island*. Together the two works define the scope and the nature of British science fiction, an enormous field that is not until recently examined separately from American science fiction in spite of considerable differences.

Cultural History of Reading: American literature Gabrielle Watling, 2009 Explores what people have read and why they have read it at different times and in different places in America and around the world. Links key cultural changes and events to the reading material of the period. Traces reading trends through an exploration of types of texts as well as specific examples of books, magazines and political treatises that were influential and/or widely read. Each chapter includes a timeline of events and an introduction to the region/time period that point out major events of the time or region that would have influenced what and how people read. An overview of reading trends and practices traces key trends in

reading practices including the development of lending libraries the rise of the novel and the impact of technology The book also explores the relationship between popular reading materials and cultural change From Intro p xi *Future Females, The Next Generation* Marleen S. Toward an Inclusive Creative Writing Janelle Adsit,2017-10-05 The creative writing workshop has existed since the early part of the 20th century but does it adequately serve the students who come to it today While the workshop is often thought of as a form of student centered pedagogy it turns out that workshop conversations serve to marginalize a range of aesthetic orientations and the cultural histories to which they belong Given the shifting demographics of higher education it is time to re evaluate the creative writing curriculum and move literary writing pedagogy toward a more inclusive equitable model *Toward an Inclusive Creative Writing* makes the argument that creative writing stands upon problematic assumptions about what counts as valid artistic production and these implicit beliefs result in exclusionary pedagogical practices To counter this tendency of creative writing this book proposes a revised curriculum that rests upon 12 threshold concepts that can serve to transform the teaching of literary writing craft The book also has a companion website www.criticalcreativewriting.org offering supplemental materials such as lesson plans and course materials The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on bloomsburycollection.com Open access was funded by Knowledge Unlatched
