Celebrating 50 Years of ACAL Laura McPherson,Sharon Rose,2021 The papers in this volume were presented at the 50th Annual Conference on African Linguistics held at the University of British Columbia in 2019 The contributions span a range of theoretical topics as well as topics in descriptive and applied linguistics The papers reflect the typological and genetic diversity of languages in Africa and also represent the breadth of the ACAL community with papers from both students and more senior scholars based in North America and beyond They thus provide a snapshot on current research in African linguistics from multiple perspectives To mark the 50th anniversary of the conference the volume editors reminisce in the introductory chapter about their memorable ACALs **Linguistic Luck** Abrol Fairweather,Carlos Montemayor,2023-05-23 Despite the considerable attention the topic of luck has received in ethics and epistemology very little has been published in the philosophical literature overtly on linguistic luck The essays collected here provide the first sustained examination of the diverse forms of linguistic luck the mechanisms available to reduce the impact of linguistic luck and how to cope with residual luck not eliminated by the causal inferential and intentional mechanisms which aim at its eradication Of primary interest is not some hitherto unnoticed widespread prevalence of luck in the determinants of meaning and communication but rather the impressive extent to which luck is reduced or eliminated therein Whether through casual inferential or intentional means the determinants of meaning and communication are impressively independent of luck and chance In fact it is difficult to imagine a world with human language where efforts to communicate succeed no better than chance Linguistic communication is only possible because robust luck reducing variables are at work The essays collected seek to understand the diversity scope and mode of operation of luck reducing mechanisms in language While it is not possible here to cover the full range of linguistic phenomena affected by luck a wide range of issues in linguistics and philosophy of language are investigated including syntax processing demonstrative reference conversational implicature testimony lexical innovation joint attention communicative value conventionalism vs anti conventionalism metasemantic safety and semantic skepticism to name a few **Strategy, Risk and Personality in Coalition Politics** Bruce Bueno de Mesquita,1975 This book presents a theory of behaviour in coalitions and presents an application of the theory to Indian political party coalitions **Forms and Systems** ,1968 Hours of Song James Henry Fillmore,1875 The Chapel Hymn Book Edwin Francis Hatfield,1873 Language and Space Peter Auer,Jürgen Erich Schmidt,2010 The dimensions of time and space fundamentally cause and

shape the variability of all human language To reduce investigation of this insight to manageable proportions researchers have traditionally concentrated on the deepest dialects But it is increasingly apparent that although most people still speak with a distinct regional coloring the new mobility of speakers in recently industrialized and postindustrial societies and the efflorescence of communication technologies cannot be ignored This has given rise to a reconsideration of the relationship between geographical place and cultural space and the fundamental link between language and a spatially bounded territory Language and Space An International Handbook of Linguistic Variation seeks to take full account of these developments in a comprehensive theoretically rich way The introductory volume examines the concept of space and linguistic approaches to it the structure and dynamics of language spaces and relevant research methods A second volume offers the first thorough exploration of the interplay between linguistic investigation and cartography and subsequent volumes uniformly document the state of research into the spatial dimension of particular language groupings Key features comprehensive coverage of the field in terms of theory and methods the unique volume stands alone since it neither is a handbook of dialectology or of areal linguistics nor a handbook on language variation alone gathers together a great number of distinguished scholars and experts in the field *The illustrated messenger [religious tracts].
