**Heidegger on Art and Art Works** J.J. Kockelmans, 1985-04-30 This book grew from a series of lectures presented in 1983 in the context of the Summer Program in Phenomenology at The Pennsylvania State University For these lectures I made use of notes and short essays which I had written between 1978 and 1982 during interdisciplinary seminars on Heidegger s later philosophy in general and on his philosophy of language and art in particular The participants in these seminars consisted of faculty members and graduate students concerned with the sciences the arts literature literary criticism art history art education and philosophy On both occasions I made a special effort to introduce those who did not yet have a specialized knowledge of Heidegger s philosophy to his later way of thinking In this effort I was guided by the conviction that we as a group had to aim for accuracy precision clarity faithfulness and depth while at the same time taking distance comparing Heidegger s views with ideas of other philosophers and thinkers and cultivat ing a proper sense of criticism Over the years it has become clear to me that among professional philoso phers literary critics scholars concerned with art history and art education and

scientists from various disciplines there are many who are particularly interested in Heidegger's philosophy of art. I have also become convinced that many of these dedicated scholars often have difficulty in understanding Heidegger's lectures on art and art works. This is understandable.

**Atalanta**, 1893     **Littell's Living Age**, 1883     **Homer** Richard Claverhouse Jebb, 1898     **Readings in Classical Rhetoric** Thomas W. Benson, Michael H. Prosser, 2013-01-11 Rhetoric the theory of oral discourse affected and indeed pervaded all aspects of classical thought. Bearing the stamp of its impact were the Homeric hymns, the Iliad and the Odyssey, Aeschylus' Eumenides, the great dramatic tragedies, the elegiac and lyric poetry, and the literature of the Romans, often formed in the Greek image. The rhetorical notion of probability had direct implications for the classical philosopher and mathematician as it does today. Departments of speech, English philosophy, and classics provide the key centers of interest in the new and the classical rhetorics. Despite the considerable enthusiasm for the study of rhetoric, no single work provides large selections of primary materials written by the classical rhetoricians themselves. Until now only secondary sources containing tiny excerpts or entire and expensive translations of the ancient rhetorical writings were available. This large anthology of primary readings of the classical rhetoricians in translation fills this large gap. The continuity and coherence of ancient rhetorical traditions is emphasized by organizing large excerpts into the topical divisions that later classical writers agreed upon. The first unit of this anthology sets forth major issues in the definition and scope of rhetoric and its appropriate place among other modes of thought and discourse. Parts 2 through 5 are organized according to the traditional canons of oratory: invention, disposition, style, memory, and delivery. In organizing the readings this way, the editors represent both the philosophical and theoretical issues in rhetoric and its pragmatic functions as a craft for making effective discourse. Selecting excerpts that illustrate the major conflicts within the unfolding tradition enables a sampling of not only the major points of view but also the arguments supporting them. This volume includes selections not only from writings of the standard classical rhetoricians but also from less typical works which have special value. The editors have utilized the best accessible translations while remaining absolutely faithful to their texts.
