Emotional Intelligence Workbook a Teach Yourself Guide Lora Greenwood, 2014-11-29

Emotional intelligence (EI) is the ability to monitor one's own and other people's emotions to discriminate between different emotions and label them appropriately and to use emotional information to guide thinking and behavior. Studies have shown that people with high EI have greater mental health, exemplary job performance, and more potent leadership skills. Markers of EI and methods of developing it have become more widely coveted in the past few decades. In addition, studies have begun to provide evidence to help characterize the neural mechanisms of emotional intelligence.
