## **The Sentinel Masterworks Of Science Fiction And Fantasy:**

**The Sentinel** Arthur Charles Clarke, 1986      Space Forces Fred Scharmen, 2021-11-02 The radical history of space exploration from the Russian Cosmists to Elon Musk Many societies have imagined going to live in space What they want to do once they get up there whether conquering the unknown establishing space colonies privatising the moon s resources reveals more than expected In this fascinating radical history of space exploration Fred Scharmen shows that often science and fiction have combined in the imagined dreams of life in outer space but these visions have real implications for life back on earth For the Russian Cosmists of the 1890s space was a place to pursue human perfection away from the Earth For others such as Wernher Von Braun it was an engineering task that combined in the Space Race the Cold War and during World War II with destructive geopolitics Arthur C Clark in his speculative books offered an alternative vision of wonder that is indifferent to human interaction Meanwhile NASA planned and managed the space station like an earthbound corporation Today the market has arrived into outer space and exploration is the plaything of superrich technology billionaires who plan to privatise the mineral wealth for themselves Are other worlds really possible Bringing these figures and ideas together reveals a completely different story of our relationship with outer space as well as the dangers of our current direction of extractive capitalism and colonisation

**Captain Scott: Icy Deceits and Untold Realities** Krzysztof Sienicki, 2016-11-01 This expertly written book is nothing less than a daring challenge to the prevailing views of Captain Robert F Scott s journey to the South Pole and consequent disaster Borrowing from various scientific disciplines Krzysztof Sienicki lucidly argues against each of the presumed causes of Captain Scott and his companions deaths In particular he demolishes the notions of extreme low temperatures ferocious winds and food fuel shortages as the main causes of the disaster Using neural network computer simulations he proves that the Extreme Cold Snap Never Ending Gale and food fuel scarcity never occurred By eliminating the alleged causes of the disaster the author provides data and arguments that the deaths Scott Wilson and Bowers were a matter of choice rather than fate The choice was made long before there was an actual end of food fuel and long before the end of the physical strength needed to reach delusive salvation at One Ton Dep t

*The Violence of the Letter* Melanie McMahon, 2023-09-27 The emergence of the alphabet in ancient Greece usually heralded as the first step in the inexorable march toward reason and progress in fact signaled the introduction of a chance technology that hijacked the future with devastating consequences for humanity By investigating an array of cultural artifacts ranging from Kubrick s 2001 A Space Odyssey to the Oracle at Delphi to Luther s challenge to the Church this book demonstrates how the apparently benign emergence of writing made possible far ranging systems of organized domination and unprecedented levels of violence The Violence of the Letter considers how a twenty six letter code changed the face of the world and not always for the better
