

# Weather Prophet

Inigo Jones (1872 - 1954) was Australia's best long-term weather forecaster.

His system is based on the larger planets of Jupiter, Saturn, Uranus and Neptune being in line with the Sun for droughts and behind the Sun by floods. The Sun produces spots, which in turn control the weather and atmospheric conditions, magnetic storms, rainfall and drought. Droughts increase and decrease in an 11-year eleven year cycle on the Sun. The balance of the four major planets of Jupiter, Saturn, Uranus and Neptune takes the high and low sunspot cycles in Queensland and when the major cycles of some together at the Equinoctial point of Right Ascension as a critical point the actual cause droughts and at each Hour of Right Ascension it would cause floods. Jupiter and is 11.86 years, Saturn is 29 years, Uranus is 84 years and Neptune is 164 years.

Inigo uses these cycles and the Shubert cycle of 35-36 years to predict the 1874 floods, which was 20 years after his death and the great drought of 1950 to 1959 which was 20 years after his death. He also predicted the 2011 floods. Low sunspot cycle causes droughts and low sunspots causes the low sunspots of 2008 was caused by Jupiter at the critical point. Drought will be again at this point in 2020. Saturn will be at the point in 2024. Droughts in Western Australia are about two years after sunspot cycle low which is 2021/22.
