When Smoke Ran Like Water Devra Lee Davis, 2002-09-30 In this detailed account of what many of us have long suspected Davis confronts the public triumphs shows how the Ethyl Corp fought for decades to keep lead in gas despite evidence of its hazards describes how other major firms have manipulated scientists the gov t regarding the hazards of toxic chemicals Makes a devastating case that our approaches to PH must change Illus *Lives Per Gallon* Terry Tamminen, 2006-10-02 Tamminen takes a hard look at health environmental and national security costs hidden in every barrel of oil He also offers a blueprint for developing alternative energy sources based on California s real world experiences

[Rachel Carson and Her Sisters](#) Robert K Musil, 2014-04-01 In *Rachel Carson and Her Sisters* Robert K Musil redefines the achievements and legacy of environmental pioneer and scientist Rachel Carson linking her work to a wide network of American women activists and writers and introducing her to a new contemporary audience Rachel Carson was the first American to combine two longstanding but separate strands of American environmentalism the love of nature and a concern for human health Widely known for her 1962 best seller *Silent Spring* Carson is today often perceived as a solitary great woman whose work single handedly launched a modern environmental movement But as Musil demonstrates Carson s life s work drew upon and was supported by already existing movements many led by women in conservation and public health On the fiftieth anniversary of her death this book helps underscore Carson s enduring environmental legacy and brings to life the achievements of women writers and advocates such as Ellen Swallow Richards Dr Alice Hamilton Terry Tempest Williams Sandra Steingraber Devra Davis and Theo Colborn all of whom overcame obstacles to build and lead the modern American environmental movement

Fluoride , 2003 *Leave It in the Ground* John C. Berg, 2019-09-03 Employing scientific explanations and hard data this book shows why coal is such a problem how the pro coal forces got to be so powerful and how those forces might be defeated through political activism Coal provided the energy to build modern civilization This energy source raised standards of living multiplied the earth s population and enabled people in developed countries to enjoy leisure time Today we know that if we burn all the coal available climate change will continue to increase But the use of coal isn t purely an environmental issue political and economic forces are also at play This book examines the politics and environmental impact of coal production and distribution presenting a clear point of view that we must shift away from coal use backed by hard data and supplying

specific prescriptions for opposing and regulating the coal industry John C Berg explains how ending the burning of coal and of oil and natural gas is a political problem rather than a technical one explodes the clean coal myth providing scientific documentation of how burning coal emits more greenhouse gases per unit of energy than any other fuel and describes how controlling coal use in the United States will also restore the possibility of a meaningful international climate agreement Additionally readers will understand the critical importance of activism from local to international in spurring government regulation to control the coal industry which can only be defeated politically **Poisoned for Pennies** Frank Ackerman,2008-05-23 *Poisoned for Pennies* shows how the The Sky of Our Manufacture Jesse Oak Taylor,2016-03-23 The smoke laden fog of London is one of the most vivid elements in English literature richly suggestive and blurring boundaries between nature and society in compelling ways In *The Sky of Our Manufacture* Jesse Oak Taylor uses the many depictions of the London fog in the late nineteenth and early twentieth century novel to explore the emergence of anthropogenic climate change In the process Taylor argues for the importance of fiction in understanding climatic shifts environmental pollution and ecological collapse The London fog earned the portmanteau smog in 1905 a significant recognition of what was arguably the first instance of a climatic phenomenon manufactured by modern industry Tracing the path to this awareness opens a critical vantage point on the Anthropocene a new geologic age in which the transformation of humanity into a climate changing force has not only altered our physical atmosphere but imbued it with new meanings The book examines enduringly popular works from the novels of Charles Dickens and George Eliot to *Dr Jekyll and Mr Hyde* *Dracula* and the Sherlock Holmes mysteries to works by Joseph Conrad and Virginia Woolf alongside newspaper cartoons scientific writings and meteorological technologies to reveal a fascinating relationship between our cultural climate and the sky overhead Under the Sign of Nature *Studies in Ecocriticism* Studyguide for When Smoke Ran Like Water Cram101 Textbook Reviews,2013-12 Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780465015221 This item is printed on demand *Choice* ,2003 *The Maritime Book of Climate Change* Richard Zurawski,2008 Richard Zurawski is a meteorologist documentary filmmaker and television and radio personality who has called Halifax his home for almost two decades He has been in the science and weather business for over 25 years For children he was the host creator and producer of *Wonder Why* *The Adventures of the AfterMath Crew* and *WiseWeatherWhys* each a syndicated 65 episode series for television For adults his documentaries on science and history range from technology to the weather to philosophy Both his children s series and documentaries are sold and enjoyed around the world He plies his meteorological bent and science proclivities with Rogers Radio in the Maritime markets of Halifax Moncton and Saint John where he is broadcast daily on the Rogers all news network *The Origin and Fate of Metals During Diesel Engine Combustion* Arthur L.
