Fuentes-George Ph.D, 2024-12-06 There is a reason that the story of globalization presented in this atlas starts in Middlebury It is in this small Vermont town home of Middlebury College where the concept for this atlas was conceived and developed where most of the maps were designed and drafted and where the analytical texts were discussed and crafted As critical scholars and professors at this liberal arts college we are keenly aware of the need for fact based analysis and of the dearth of reliable maps about global processes and flows We joined together to create an illustrated text that could cast light on the complex nature of globalization We developed a comprehensive outline of topics and a list of about 100 maps We were fortunate to have drafts of about half of the maps from the Perthes World Atlas that Guntram had edited previously but it was clear that we needed to make substantial revisions develop at least 50 maps on our own and design a companion website for data updates and additional imagery We decided to draw on the skills and insight of our students to master this challenge not just to help us conduct research and design maps but also to bounce off ideas for the text and maps and to develop an atlas that was most effective for classroom use We recruited 15 Middlebury College student research assistants with profound international experience and training in data management and visualizations such as Q GIS Adobe Illustrator and coding As a team we researched options for data collection discussed strategies for the best representation of data classes and conferred about design choices We faced many difficult choices such as how to represent data for regions in the world that are occupied by foreign countries how to draw international boundaries that are contested what to use as the most reliable indicator for social phenomena or where to source photos for the website In the end the strength of the education of IMPRINT our Middlebury students our own scholarly work the experience in the classroom and Middlebury's international links helped us address these challenges Middlebury was instrumental in making this atlas a reality It offered generous support for our research students and the production of the atlas and website Its deep commitment to global education served as an inspiration Middlebury College attracts students from all over the world who come here to pursue an undergraduate degree in liberal arts Every summer the campus houses its renowned language school where students learn 13 world languages including Abenaki which is spoken by the Indigenous inhabitants who call this place home Just up the road in the Green Mountains the annual Bread Loaf School of English and Writers Conference draws teachers and writers from all over the globe Middlebury's presence extends far beyond the east coast On the other side of the American continent is the Middlebury Institute of International Studies its Graduate School in Monterey California and Middlebury is in places as far flung as China Russia India France Morocco Cameroon Brazil there are a total of 32 Middlebury C V Starr Schools
