the world's population with access to the internet has doubled from 32% in 2011 to 63% in 2021. 90% of people from developed countries access the internet in 2021. At the same time, the number of social network users is increasing. These networks have the purpose of connecting with friends. In 2022, 5 billion people have access to the internet worldwide, and 4.7 billion people use social media. Ultimately, 93% of those with internet access own at least one social media account, which is more than half the population worldwide. Through time, companies found new marketing strategies which reached active people on social media. These platforms are necessary to reach Generation Z people born in the late 1990s. They are different and cannot be reached in the same way as they watch Netflix instead of TV or listen to Spotify instead of the radio, for example. Influencer marketing became a 10 billion industry in 2020. Influencers share their lives on social media networks. Due to their high reach, they receive offers from companies for cooperation. Influencers' followers admire and trust their recommendations due to their personal and authentic representation. While advertising products, influencers show how to use them, where to buy them, and give their opinion. For higher sales, influencers often receive promo codes for a discount or free products for each order.

**Business Week, 2007      Exploring the impact of social media on individuals' self-esteem and body image**

Hanna Belhorodska, 2023-08-30. Essay from the year 2023 in the subject Communications, Public Relations, Advertising, Marketing, Social Media, grade C. Paedagogic Institute for Psychoanalysis and Psychotherapy, Hannover, language English.

**Abstract:** Social media offers a plethora of opportunities for individuals to share their thoughts, experiences, and interests with a global audience, blurring the lines between personal and public spheres. Users can post photos, videos, status updates, and engage in real-time conversations, facilitating instant communication and fostering virtual communities. Beyond personal interactions, social media has also emerged as a powerful platform for businesses, influencers, and organizations to reach their target audiences, influencing consumer behaviors and shaping societal trends. The allure of social media lies in its promise of connectivity and belongingness, allowing users to form and maintain social relationships regardless of physical proximity. However, the pervasive nature of these platforms and the constant exposure to a stream of curated content have raised concerns about their potential impact on individuals' psychological well-being. In light of these concerns, researchers and mental health professionals have sought to understand the intricate relationship between social media usage and individuals' psychological well-being, particularly concerning self-esteem and body image. By investigating the potential effects of social media on these aspects, researchers aim to unveil the complexities of virtual interactions and their implications for mental health. This research paper aims to explore the impact of social media on individuals' self-esteem and body image, with a focus on understanding how these platforms influence self-perception, body satisfaction, and overall psychological well-being. By shedding light on this critical area of study, this research intends to provide valuable insights for individuals, parents, educators, mental health practitioners, social media platforms, and policymakers, guiding the development of strategies to promote a healthier and more positive online environment.
