Consider every time you use a credit card, the Internet, or your mobile phone, the one thing that stands between you and everyone else knowing your business is cryptography, the making of secret ciphers. Yet rather than safeguarding this fragile privacy, powerful government forces have been fighting since the 1980s to keep crypto under their control. But while the official forces warn of unrestrained criminality and terrorism, those squared against them celebrate the possibility of a new era of empowered individuals benefitting from crypto anarchy.
